MODULAR CABLE SYSTEM	YES	NO	NO	NO
WORKS ON LITHIUM ION	YES*	NO	NO	NO
SAFELY CHARGES MULTIPLE BATTERIES	YES	NO	NO	NO
MOUNTS ON THE WALL OR IN CAR	YES	NO	NO	NO
PULSE CLEAN DESULFATOR MODE	YES	NO	NO	NO
CHARGE PERCENTAGE LCD DISPLAY BAR	YES	NO	NO	NO
LOW VOLTAGE ALARM	YES	NO	NO	NO

* Our P/N: #9950 is our only model which charges 12 & 16 Volt Lithium Ion batteries

Q & A

CAN I LEAVE IT PLUGGED IN THE LONG TERM? Yes, the advanced micro-processor in our units will automatically switch from Charger mode to Maintenance mode once the battery has reached peak voltage. Then, the Pulse will occasionally exercise the battery to keep it in excellent condition even in the off season.

HOW QUICKLY WILL IT CHARGE A BATTERY? This depends on the condition of the battery, but for the more powerful models, it can take a few hours. If you have a dead battery and need assistance immediately, our MICRO-JUMP starter will jump start a vehicle from anywhere.

WHAT REALLY MAKES YOUR CHARGERS DIFFERENT? Pulse Cleaning Technology, Micro-Processor Control, Automatic Battery Voltage and Type recognition, Automatic switching between Charger / Maintenance mode and a Modular Cables System... to name a few.
