3101 WHIPPLE ROAD #29
UNION CITY, CA 94587

Dear Valued Customer,

I'd like to take this opportunity to thank you for your interest in the **Battery Saver™** line of battery tools. We offer a wide variety of products designed to charge, maintain, test and jump your vehicle's battery. The key to our charging and maintaining products is the advanced micro-processor which monitors and regulates the unit to maximize the effectiveness of the voltage output while keeping the device more energy efficient. This advancement in technology also allows for all our chargers and maintainers to desulfate the battery using our PULSE CLEANER design and in the case of our dual voltage units, to switch automatically between voltages. Smart. Many of our products also feature our signature built-in LCD Digital Battery Tester. This provides additional functionality as you can now (simply and easily) read the condition of your vehicle's battery, while the LCD model unit is attached to your battery. For questions or more information, please feel free to call us, email us or send us a message on social media.

Best regards,

Frank Gabrielli

President

What Makes A Better Solution for Batteries?

Advanced Pulse Cleaning Technology

Attaching the Battery Saver™ to a battery turns on the automatic pulse circuitry. These reverse pulses begin to clean the plates.

As the battery charges, the pulse action begins to break down the lead sulfate that is attached to the plates.

Pulse works to reverse lead sulfate buildup on the battery plates improving its condition and life.

With time the plates begin to conduct electricity again, the Voltage of the battery increases and electron flow is re-established.

The Battery Saver™ computer maintains a consistent voltage that allows the battery to work at optimum performance levels. Additionally, it continues to pulse the battery plates and also exercises the battery while "Burping" the battery to help keep the sulfuric acid and water mix balanced.

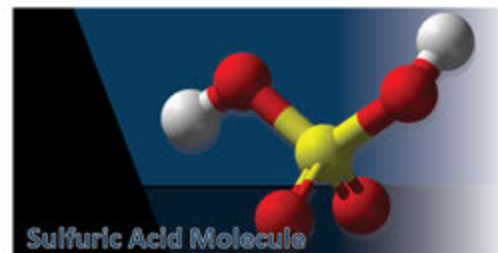

Long term storage and non-use is compensated for by this state-of-the-art technology. The battery will now be ready to go when needed.

When the plates are cleaned the voltage level increases giving the battery additional power.

Our Advanced Auto-Pulse Technology strengthens a battery by breaking down the build up of sulfation on the plates. Sulfation is the number one cause of premature battery replacement and it occurs most commonly from allowing the battery to sit for long periods of time. There are two things that effect a battery that is unused or in storage. The first is the battery voltage drops between 1% - 5% per month. The reason we want to keep a battery charged all the time is that when a battery discharges the sulfur molecules move over next to the lead plates.

They are attracted to each other and when the proximity gets closer they can more readily turn themselves into a new compound, lead sulfate. The lower the voltage, the more likely they are to combine. The second negative effect is called "battery stratification." Since a battery is comprised of 30% water and 70% sulfuric acid, when the battery sits for a long period of time they separate. Water weighs less than sulfuric acid and it goes to the top of the battery and also increases the concentration of the sulfuric acid to the bottom of the battery, again causing sulfation.

Battery Saver™ can rescue sulfated batteries when it is connected to a battery. It maintains the voltage level so that the sulfur stays in the sulfuric acid and doesn't migrate to the plates. Additionally, it also performs a process called "Burping" where it periodically increases the voltage supplied to the battery to create tiny bubbles and promote the mixture of the sulfuric acid and water. "Burping" is also built into the operation of alternators and generators, which periodically provide 14.4v - 14.6v to the battery, causing the "Burping" effect. If a battery is maintained in this manner, it will last longer. Batteries need exercise... we do it electronically.

Our advanced programming allows the charger to work with a variety of battery sizes and types. No longer do you need a specific type of charger for AGM, Dry Cell, Spiral Cell, Deep Cycle, Gel or SLA batteries. We work with all battery types and so it automatically recognizes the battery's needs and gives power accordingly. Battery Saver™ works with small to large batteries including deep cycle, marine and industrial. Our larger chargers can maintain motorhomes, golf carts, electric cars, mobility cars and industrial equipment with multiple batteries.

12 WATT PULSE MAINTAINER

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "1200" series is our 12 watt economical line of dual voltage maintainers. These models are physically the smallest we offer. They each feature our signature Auto-Pulse desulfation technology, micro processor control and can automatically recognize both 6 and 12 volt batteries and will switch to the correct charging setting when connected. Perfect for long term maintaining.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

Included Cables: 2' Alligator Clip-On 2' Terminal Lug 6' AC Power (Built-In) & Removable Mounting Bracket

Specifications:

25 WATT PULSE MAINTAINER

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "3015" series is our 25 watt line of dual voltage maintainers. These models are more powerful than the "1200" line, as well as being physically larger. This allows you to charge and maintain a system with up to two batteries. All models utilize our signature Auto-Pulse desulfation technology and patented micro processor control. This guarantees you a safe and reliable charging and maintaining process. These models recognize both 6 & 12 volt batteries and will automatically switch to the correct charging setting when connected.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

Included Cables: 6' Alligator Clip-On, 2' Terminal Lug, 6' AC Power & Mounting Bracket

Specifications:

INPUT CHARACTERISTICS: AC INPUT: 90 - 264V AC **FREQUENCY:** 47 Hz - 63 Hz **INPUT CURRENT:** 1.5 AMPS **HOLD UP TIME:** 8 mSEC

50 WATT PULSE CHARGER, MAINTAINER

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "2365" series offers our most powerful charging and maintaining capabilities. The different models have been designed to work optimally with that specific voltage battery or battery system. As is the case with all of our chargers and maintainers, these units have a built-in micro processor control to guarantee the quality of the charge and to ensure everything runs smoothly. Additionally, all of these units feature our AUTO PULSE desulfation technology to extend your battery's life.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

50 WATT "ALL-IN-ONE" PULSE CHARGER

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "9950" is our Top Dog! It's the new heavy artillery of our Charger line. This "All-In-One" model, provides new capabilities that support both 12v - 16v Lead Acid and 12v - 16v Lithium Modes. The "9950" also has a CLEAN mode, which will PULSE CLEAN your battery's plates from the sulfate that may have built up over the years. It combines our most powerful charger with the sophisticated micro-processor control and PULSE Maintaining. The LCD screen displays the Charge percentage bar, voltmeter, and AMP output meter. It can diagnose if there is an issue, allowing you to determine whether the problem is your vehicle's battery or alternator not charging the battery properly.

Works with SLA, AGM, Gel, Deep Cycle, Spiral Cell, Deep Cycle & Now Lithium Ion batteries!

With Built-in
USB Ports!

GOOD BATTERY

If the Voltage is above 12 Volts,
the battery symbol will be blue.

WEAK BATTERY

If the Voltage is below 12 Volts,
the battery symbol will be red.
The battery is weak and needs
to be recharged.

12 VOLT CCA ADVANCED TESTER

ADVANCED VEHICLE BATTERY/ELECTRICAL SYSTEM DIAGNOSTIC CAPABILITIES!

The Advanced 12 Volt CCA, Voltage and Internal Resistance Digital Battery Tester features CCA testing, an internal resistance check, the battery's voltage and a battery life percentage bar. Its easy to use "Clip-On" design allows you to easily take it from battery to battery. It monitors the exact voltage of the battery, tests how much life is left in the battery and can check the exact Cold Cranking Amps that the battery is producing and the Internal Resistance. This model can test batteries as small as 100 CCA all the way up to 1500 CCA. We provide an advanced tester that will give you all the information you need, for a fraction of the cost of the more expensive professional testers.

Specifications:

LCD DISPLAY: 6 DIGITS P/N 4342 9 - 15 VOLTS DC OPERATION

CCA RANGE: 100 - 1500 CCA

ENVIRONMENT: 0 - 40 degrees(C), 20 - 80% HUMIDITY

12 WATT PULSE MAINTAINER BUNDLE

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "1200" series offers our most energy efficient capabilities combined with our advanced micro-processor controlled maintaining, dual voltage design and Pulse CLEANING technology to prevent the battery from sulfating and provide the best and safest long term battery care of any product on the market. This model also features a "Battery Rescue" recovery mode that is unique to the dual voltage models. This feature allows you to charge a battery from a completely dead condition and bring it back to life with continued use from the maintainer. The Multi-Pack kit includes 4x Mini-Maintainers and 4x 20' DC Extension Cables, giving you the reach you need to maintain vehicles from anywhere inside a large garage.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

Included Cables: 4x 6' AC Power (Built-in), 2x 2' Alligator Clip-On, 2x 2' Terminal, 4x 20' DC to DC Extension & 4x Mounting Brackets

Specifications:

12 WATT PULSE MAINTAINER TESTER BUNDLE

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "1200-LCD" series offers our most energy efficient capabilities combined with our advanced micro-processor controlled maintaining, dual voltage design, and Pulse CLEANING technology to prevent the battery from sulfating and provide the best and safest long term battery care of any product on the market. This model also features a "Battery Rescue" recovery mode which can charge a battery from a completely dead condition and bring it back to life with continued use from the maintainer. It also features a built-in Digital Battery Tester with a battery charged percentage bar, Voltmeter and AMP output display. This Multi-Pack kit includes 4x Mini-Maintainers and 4x 20' DC Extension Cables, giving you the reach you need to maintain vehicles from anywhere inside a large garage or warehouse.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

Included Cables: 4x 6' AC Power (Built-in), 2x 2' Alligator Clip-On, 2x 2' Terminal, 4x 20' DC to DC Extension & 4x Mounting Brackets

Specifications:

INPUT CHARACTERISTICS: AC INPUT: 90 - 264V AC FREQUENCY: 47 Hz - 63 Hz

INPUT CURRENT: .75 AMPS HOLD UP TIME: 8 mSEC

PROTECTION: INPUT FUSED 1 AMPS (OV) OVER CURRENT (OV) OVER VOLTAGE

(SC) SHORT CIRCUIT (RP) REVERSE POLARITY

OUTPUT CHARACTERISTICS 06.8 VDC 1.25AMPS - 12 WATTS (P/N 6259)

13.6 VDC 1.08AMPS - 12 WATTS (P/N 8239)

RIPPLE & NOISE 120 mV or less

ENVIRONMENT: 0 - 40 degrees(C), 20 - 80% HUMIDITY

WARRANTY: 12 MONTH LIMITED WARRANTY DIMENSIONS: 7.5 LBS - 16.0" x 10" x 6"

LARGER PACKS AVAILABLE

12 Watt PULSE Maintainer & Tester Bundle - 8 Pack (P/N: #8239-8)

Included Cables: 8x 6' AC Power (Built-in), 4x 2' Alligator Clip-On, 4x 2' Terminal, 8x 20' DC to DC Extension & 8x Mounting Brackets

12 Watt PULSE Maintainer & Tester Bundle - 12 Pack (P/N: #8239-12)

Included Cables: 8x 6' AC Power (Built-in), 4x 2' Alligator Clip-On, 4x 2' Terminal, 4x 20' DC to DC Extension

50 W PULSE CHARGER MAINTAINER TESTER

With PULSE CLEANER Desulfation "Battery Extending" Technology!

The **Battery Saver™** "2365" series is our 50 watt line of dual voltage Chargers/Maintainers. These models are more powerful than the "3015" line, as well as being physically larger. This allows you to charge and maintain a system with up to two batteries. All models utilize our signature Pulse CLEANER desulfation technology and advanced micro-processor control. This guarantees you a safe and reliable charging and maintaining process. These models recognize both 6 & 12 volt batteries and will automatically switch to the correct charging setting when connected. This Multi-Pack kit includes 4x "All-In-One" Chargers and 4x 20' DC Extension Cables, giving you the reach you need to maintain vehicles from anywhere inside a large garage or warehouse.

Works with Lead Acid, AGM, Gel, Dry Cell, Spiral Cell & Deep Cycle batteries!

Included Cables: 4x 6' AC Power, 2x 6' Alligator Clip-On, 2x 6' Terminal, 4x 20' DC to DC Extension & 4x Mounting Brackets

Specifications:

INPUT CHARACTERISTICS: AC INPUT: 90 - 264V AC FREQUENCY: 47 Hz - 63 Hz

INPUT CURRENT: 1.75 AMPS HOLD UP TIME: 8 mSEC

PROTECTION: INPUT FUSED 5 AMPS (OC) OVER CURRENT (OV) OVER VOLTAGE

The **Battery Saver™** Cables are designed based around the idea that versatility, reliability and convenience are of the utmost importance when connecting a vehicle to our chargers. We offer more methods to connect, a larger variety of cable lengths and an all around higher quality of cable. Our choice on gold plating the cable connections was because it oxidizes less in harsh environments than the tin or copper used by our competitors.

Designed for versatility, reliability and quality.

Our exclusive high quality modular cable design supports extended runs to any car, truck, motorcycle, RV, ATV, boat & golf cart. We offer both a terminal lug and alligator clip-on cable with each unit to guarantee that regardless of the situation, you have the cable you need.

- Ultra Reliable GOLD Connectors
- Bright Yellow "Easy to See" Wire

ACCESSORIES

HIGH QUALITY CASES AND ENCLOSURES THAT MAKE LIFE A BIT EASIER

ACCESSORY TRAVEL KIT

PADDED CARRYING CASE • 20' EXT CABLE • 3' VOLTMETER CABLE

P/N: 4015

The Accessory Travel Kit includes one Padded Carrying Case, 20' DC Extension Cable and a 3' Voltmeter Probe Cable, which can be used with any of our Charger/Maintainer models that have a built-in LCD Digital Battery Tester.

PADDED CARRYING CASE

HEAVY DUTY ZIPPER • HAND STITCHED HANDLE FOR EASY CARRYING

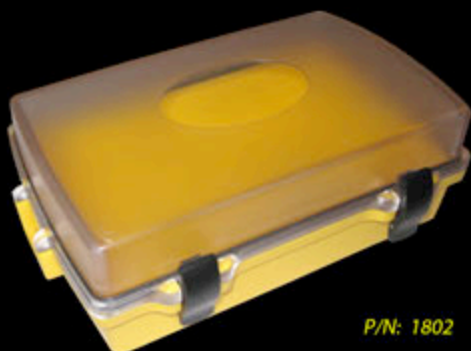

P/N: 2360

The Padded Carrying Case is made of high quality Ballistic Nylon material, has a hand stitched handle and heavy duty zipper. The large size fits all Charger/Maintainer products and their cables, plus some extras... like our DC extension cable.

WEATHER RESISTANT ENCLOSURE

FOR OUTDOOR USE • CONNECTIONS SEALED! • WORKS WITH ALL BATTERY SAVER CHARGER/MAINTAINER MODELS

P/N: 1802

The Weather Resistant Enclosure is durable and designed to handle the harshest elements. The inside comfortably fits any size Charger/Maintainer we offer. It protects both the unit and the connections on either side of the charger with it's air-tight seal. This is perfect solution for maintaining a vehicle outdoors!

Q & A

CAN I LEAVE IT PLUGGED IN THE LONG TERM? Yes, the advanced micro-processor in our units will automatically switch from Charger mode to Maintenance mode once the battery has reached peak voltage. Then, the Pulse will occasionally exercise the battery to keep it in excellent condition even in the off season.

HOW QUICKLY WILL IT CHARGE A BATTERY? This depends on the condition of the battery, but for the more powerful models, it can take a few hours. If you have a dead battery and need assistance immediately, our MICRO-JUMP starter will jump start a vehicle from anywhere.

WHAT REALLY MAKES YOUR CHARGERS DIFFERENT? Pulse Cleaning Technology, Micro-Processor Control, Automatic Battery Voltage and Type recognition, Automatic switching between Charger / Maintenance mode and a Modular Cables System... to name a few.

THANK YOU FOR YOUR INTEREST IN OUR PRODUCTS!
